05 **BRANDING** BRANDS WITH PERSONALITY

Our Creative will put you at the head of the class. We create smart, innovative communication channels that will take you to where you need to be. With our smart ideas, stylish work, and successful communication, we will infuse your entire brand with a unified strategy, voice and look to maximize your return on investment.

07

OUR VISION

The online world is, in a word, crazy: crazy competitive, crazy versatile, and sometimes just plain old loony . The way we see it, there are two ways your brand can enter the marketplace: stay traditional and get lost in the crowd, or embrace the weird and wonderful world of the internet and go a little nuts. And if you're planning on going in the second direction (which we would highly recommend), you'll need a guide who knows their way around. That's where we come in.

08

OUR MISSION

Ideas are easy - how often do you run into someone with an idea for a video or an app which they insist is going to change the world? And be honest: how often have you been that person? But what if your idea needs a sleek website? Or a cutting-edge app? SEO? Media buying? Mobile Advertising? Social Nuts does all of these and so much more. Our job is to be your eyes in the web, recommending the best channels and mediums for your story and executing through every step of the process.

09

OUR GOAL

So let's say you've found someone to execute your vision - does that someone have a deep, almost obsessive, understanding of your brand? We specialize in taking your brand idea - however big, small, or unhinged - and creating an engaging digital story targeted at the people you want to hear it. Because in the age of social media, where everyone is equipped with the tools of the storyteller, how and to whom you tell your story is just as important as what you have to say and why you're saying it. Or, to put it another way: shouting at nobody in particular is pretty nuts...
but it's not our kind of nuts.

A close-up, high-contrast photograph of a person's face, focusing on the mouth. The person's skin is dark and appears to be covered in a fine, pebbled texture, possibly a prosthetic or a specific skin treatment. Their lips are coated with a thick, bright orange liquid that is dripping down the center of the lower lip. The background is dark and textured, with faint, glowing lines resembling lightning or cracks. The overall mood is dramatic and intense.
